

Task 4

```
import java.util.Arrays;
import java.util.OptionalInt;

public class MaximumElement {

    public static void main(String[] args) {

        int[] arr = {12, 45, 67, 23, 89, 11};

        OptionalInt max = Arrays.stream(arr).max();

        if (max.isPresent()) {

            System.out.println("Maximum Element: " + max.getAsInt());

        } else {

            System.out.println("Array is empty.");

        }

    }

}
```

Output

Maximum Element: 89
