

Task 6

```
import java.util.stream.IntStream;

public class AllPairs {

    public static void main(String[] args) {

        int[] arr = {1, 2, 3, 4};

        IntStream.range(0, arr.length)

            .forEach(i ->

                IntStream.range(i + 1, arr.length)

                    .forEach(j ->

                        System.out.println("(" + arr[i] + ", " + arr[j] + ")")

                    )

            );

    }

}
```

Output

```
(1, 2)
(1, 3)
(1, 4)
(2, 3)
(2, 4)
(3, 4)
```

```
