

Task 9

```
import java.util.Scanner;
import java.util.stream.Collectors;
public class PalindromeJava8 {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter a number: ");
        String number = sc.nextLine();
        String reverse = number.chars()
            .mapToObj(c -> String.valueOf((char) c))
            .collect(Collectors.collectingAndThen(
                Collectors.toList(),
                list -> {
                    java.util.Collections.reverse(list);
                    return String.join("", list);
                }
            ));
        if (number.equals(reverse)) {
            System.out.println("Palindrome");
        } else {
            System.out.println("Not a Palindrome");
        }
    }
}
```

Output

Enter a number: 9

Palindrome
