

Task 2

```
import java.util.Scanner;
import java.util.stream.IntStream;

public class AccessElementJava8 {
    public static void main(String[] args) {
        int[] arr = {10, 20, 30, 40, 50}

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter index: ");

        int index = sc.nextInt();

        IntStream.range(0, arr.length)
            .filter(i -> i == index)
            .map(i -> arr[i])
            .findFirst()
            .ifPresentOrElse(
                System.out::println,
                () -> System.out.println("Invalid Index")
            );
    }
}
```

Output

```
Enter index: 4
50
```

```
